SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

<u>Protective equipment:</u>	Non-emergency personnel should wear protective equipment.
	See Section 8
<u>Emergency procedures:</u>	Evacuate personnel to safe areas. Keep unnecessary personnel away. Keep people away from and upwind from release. Dust deposits should not be allowed to accumulate on surfaces, as sufficient dust may result in risk of flammable mixture. Use only non-sparking tools. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust or fumes to levels exceeding the exposure limits. Wear appropriate protective equipment and clothing during clean-up. Do not breathe dust. Do not touch damaged container or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. For emergency responders	
<u>Personal protective equipment:</u>	Gloves. Safety glasses. Protective clothing. See section 8.

6.2 Environmental precautions:

Contain released substance, pump into suitable containers. Plug the leak, cut off the supply. Dam up the solid spill. Knock down or dilute the dust cloud with water spray. Prevent release into waterways or sewer.

6.3 Methods and material for containment and cleaning up

For containment:	Eliminate all ignition sources. Take precautionary measures against static discharge. Use only non-sparking tools. Avoid release into waterways or sewer, this material contains chemicals classified as water pollutants under the Clean Water Act.
Clean-up:	Collect spill. If sweeping is necessary use a dust suppressant agent which does not react with this product. Sweep up or vacuum cleaner equipped with heap filter. Avoid dispersal of dust in the air. Minimize dust generation and accumulation. Wed down with water and dike for later disposal. Following product recover, flush area with water.
